

ATS-01 Towel Anti-Theft System

Features

- Built-in UHF RFID 4 port reader
- Light strobe and buzzer with volume control
- Superior performance in the most demanding applications
- Unprecedented ease of deployment (requires only power)

Applications

- Gyms, hotels and any industries that deals with towels, bathrobes, uniforms, etc.

Radiant Sensors' ATS-01 wireless 4-port TOWEL anti-theft system is designed for gyms, hotels and any industry that deals with towels, bathrobes, uniforms, etc. ATS-01 is an all-in-one system that already contains the necessary hardware and software to run right out of the box. The device is Plug & Play and does not require any configuration. Simply connect AC power, the antennas using RF cables, and your system is ready for use.

ATS-01 TOWEL anti-theft system is designed to be installed at the exit door of the facility just like an exit sign. It can also be placed on the counter. When an RFID-tagged item is detected by any of the RFID antennas, the reader beeps and the strobe light "TOWEL" blinks. Easy to use volume control allows adjustment of the buzzer volume to fit any environment.

Specifications

Model No.	AST-01
Product	All-in-one plug & Play towel anti-theft system
Colour	White
Standard	EPC global UHF Class 1 Gen 2 / ISO 18000-6C
Frequency Category	UHF
Frequency	865-868 MHz (EU & Related) 902-928 MHz (US)
Region	EU, US
Transmission Power	+10 to +30 dBm
Net Weight	1 Kg
Operating Temperature	-20 °C to +50 °C
Dimensions	185 × 235 × 70 mm (9.25 x 2.75 x 7.25 inch)
IP Rating	IP52

Radiant Sensors designs, develops and manufactures IoT sensor devices as well as RFID hardware products for short and long-range wireless identification technology. Our devices are field-proven and have been in operation for many years throughout the world
